### PROJECTS AND REFERENCES

#### News-App Application

Front-end Developer

Created a personal application "News-App" using the "Angular" language and utilizing an open-source API (newsAPI) to display the top 10 real-time news and provide access to various press agency websites worldwide.

- Tools used: **Angular, Angular-Material, tailwindCSS** and **json-server**.
- Source code: <https://github.com/ayoub-aouinti/NewsApp-Angular.git>

#### Quizz-App Application

Front-end Developer

Created a personal web application "Quizz-App" using the "Angular" language that generates a quiz and displays the result.

- Tools used: **Angular, Angular-Material, tailwindCSS, Bootstrap, json-server**.
- Source code: [https://github.com/ayoub-aouinti/Quizz\\_APP\\_Angular.git](https://github.com/ayoub-aouinti/Quizz_APP_Angular.git)

#### E-SHOP web-Application

Full Stack Developer

Created an E-commerce website "E-SHOP" using the "PHP" language. Users of this site can log in as an administrator to manage different products and inventory or as a visitor (customer) to view available products and place an order.

- Tools used: **PHP, Bootstrap, MySQL, Html, CSS**.
- Source code: <https://github.com/ayoub-aouinti/ecommerce-PHP-website.git>

### PROFILE

With experience in hydraulic engineering projects, I bring valuable skills to software development. My expertise in analysis, project management, and system design translates into web development, where I create high-performing solutions. I stay up-to-date with technological advancements to ensure high-quality and scalable applications.

### LANGUAGES

**English:** Intermediate

**French:** Advanced

**Arabic:** Native

### CERTIFICATIONS

06/2023

#### Angular - The Complete Guide (2023 Edition)

Udemy, online

05/2023

#### Database Structures and Management with MySQL

COURSERA (authorized by META), online
